A Report on World Environment Day

On June 5, 2024, the Department of Botany celebrated World Environment Day in collaboration with the Youth Red Cross and Red Ribbon Unit. The purpose of the event was to raise awareness of environmental problems such as pollution, deforestation, climate change, and biodiversity loss. With a focus on land restoration, desertification, and drought resistance, this year's theme is "Our Land, Our Future, We Are Generation Restoration," underscoring the significance of these problems in attaining sustainable development.

On this occasion, a green festival was held and the seedling distribution programme was blessed by Sri Adichunchanagiri Mahasamsthan Math, Karnataka Stata children's sahitya parishad, Bhumi Samithi andolan, and BGS group educational institutions in association with Sri Adichunchanagiri College.

As everyone knows, the environment is extremely valuable to all living things. Without a wholesome atmosphere, we are nothing. To raise public awareness of the environment on Environment Day, a procession was held prior to the podium ceremony. At 10 a.m., we began our procession from SAFG College with our students and faculty, holding signs that read, "Our Land, Our Future," "Save the Mother Earth," and other similar phrases. Our procession ended back at the college. We held a plantation programme at our campus where we planted new plants and raised awareness of the environment among all those in attendance.

At the program's opening, Dr. C.N. Balakrishna, the MLA for Channarayapatna, stressed the importance of maintaining environmental balance in daily life by engaging in eco-friendly activities. Man must live in a clean environment in order to maintain good health. So, everyone ought to give environmental preservation first priority. Make the world a better place by planting one seedling for each person. He asserted that everyone has a responsibility to safeguard the environment and that everyone should raise awareness of this. Later our Sri Sri Shambhunatha Swamiji, Secretary, Hassan and Kodagu speaks about the importance of environment to our life and our responsibility in protecting environment for future and also said that all our idols, emphasis on environmental protection will ensure clean air and water for future generations.

Mrs. J M Pallavi, Zonal Forest Consvator said that our land is our future and it is our responsibility to protect it. A fertile land that is on the verge of degradation should be protected. She explained Urbanization and changed agricultural practices are also the reasons for this. By making the land greener, the imbalance should be avoided. The programme was successful because of the participation of the State Children's Literature Council President CN Ashok, Assistant Forest Conservator Chandrashekharaiiah, Taluk Hospital Administrative Medical Officer Dr. V. Mahesh, Subbuswamy, and others.
