1.3.1 List and description of courses which address Professional Ethics, Gender, Human Values, Environment and Sustainability in the Curriculum

Name of the programme	Paper	Value addressed	Course outcome
B.A, B.Sc and B.Com	Environmenta I Studies	<i>Environment and Sustainability</i>	This course aims to expose students to the significance of EVS as a curricular area at primary level. While engaging in a critical enquiry of EVS as a school subject, students also learn to develop insights into the issues of Curriculum design and implementation.
B.SC, (Zoology)	DSE 1B : Environmenta I biology (Elective-2)	<i>Environment and Sustainability</i>	This course assist to understand the relationship between biotic and abiotic factors, the exploitative human activity is polluting the environment locally and globally this needs attention and urgent action. To create awareness about wild flora and fauna, better understanding of renewable and non renewable resources, To prepare the individual and society to face and escape from natural and manmade disasters with scientific management and societal involvement.

Environmental Biology

Syllabus:

UNIT I

Ecology – Definition, sub-divisions and scope; **Environment** – Types: composition and strata of Atmosphere, hydrosphere and lithosphere; **Ecological factors**: Abiotic and biotic; **Abiotic factors** – light, temperature (thermal stratification), topographic (latitudes and altitudes); **Biotic factors** – Animal relationships with relevant examples: Intra specific- co-action, aggregation and competition, Gause's principle; Inter specific: positive interaction – mutualism, commensalism, proto co-operation; negative interactions – parasitism, predation, and competition.

UNIT II

1. Biogeochemical Cycles and Food chain

Definition, complete and incomplete cycles, Nitrogen and phosphorous cycles

Food chains: types of food chains with examples and food web with examples. Ecological pyramids (number, biomass and energy) with examples.

Energy – energy flow and laws of thermodynamics.

2. Population and Community Ecology:

Population ecology – density – natality and mortality, age distribution. Community ecology – types of communities and community structure, bio-indicators of aquatic ecosystem, ecotone and edge effect. Ecological succession – basic types - primary and secondary, climax community.

UNIT III

Ecosystem

Concept, types and structure of ecosystem, natural, human engineered and micro –ecosystems.

Fresh water ecosystem – physico-chemical nature of fresh water. Lentic and lotic ecosystems with examples. The tropical pond as an ecosystem – abiotic components, producers, consumers and decomposers, interaction between components.

Terrestrial ecosystem – physico-chemical nature, soil profile, classification, biomes: forest, grassland and desert and characteristic fauna .

UNIT IV

Environmental Pollution

Definition and types – air, water, soil and sound pollutions.

Sources, effects and control of air, and water pollution with special mention of green house effect, ozone depletion, photochemical smog, acid rain, stone leprosy. Ganga river pollution, mass death of fishes in lakes,; Legislation for environment protection in India, Pollution control board in Karnataka-functions

UNIT V

Zoogeography and Wild life conservation

Zoogeographical realms and their characteristic fauna. Detailed account of fauna of oriental region, a brief account of Wallace's line.

Wildlife Depletion: Hunting, over-harvesting, developmental activities

Wildlife Conservation: conservation strategies (*in situ* and *ex situ*), agencies engaged in wildlife conservation, Government organizations and non-government organizations (NGOs). Wildlife (Protection) Act 1972, CITES (Convention on International Trade in Endangered Species of wildlife flora and fauna), Endangered fauna of India, Red data book.

ABILITY ENHANCEMENT COMPULSORY COURSE (AECC) ENVIRONMENTAL STUDIES

The module consists of 8 units in which the first seven units will cover 45 lectures which are classroom based to enhance knowledge skills and attitude to environment. Unit 8 is based on field activities which will be covered in 5 lecture hours and would provide students first-hand knowledge on various local environmental aspects.

1. Environmental Studies (AECC) is made compulsory core module syllabus framed by UGC for all the Indian Universities as per the directions given by the honorable Supreme court, which believed that, conservation of environment should be a national way of life and to be inculcated into the education process. The committee proposes a staggered implementation for this course as shown below. This facilitates the distribution of the teaching workload of an institution.

Subject	Environmental studies Ability Enhancement Compulsory Courses(AECC)	Semester
Course	B.Sc./ B.A./ BCA	I
	B.Com*/B.B.A/B.H.M	II

2. To ensure the interdisciplinary spirit of the proposed curriculum, teaching must be carried out by the faculty who are trained at post-graduate (M.Sc.) and Ph.D. in the 'Environmental Science subject only. A candidate who is qualified with UGC-NET/K-SET in the area of Environmental Science will be well- equipped to teach this curriculum.

3. The scheme of Examination and the question paper pattern for AECC – Environmental Studies will be **multiple choice questions (MCQ)** for 60 marks and 40marks for internal assessment with **4 hours** of teaching per week with 2 credits.

AECC - ENVIRONMENTAL STUDIES SYLLABUS

Number of Theory Credits	Number of lecture hours	Number of field work hours
2 (LTP 3-1-0)	45	5

	Content of AECC - Environmental Studies	45 hours
Unit 1	Introduction to Environmental Studies	2
	Multidisciplinary nature of environmental studies Scope and importance; Concept of sustainability and sustainable development.	
Unit 2	Ecosystems	6
	Ecosystem - Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems: <ul style="list-style-type: none"> a) Forest ecosystem, b) Grassland ecosystem, c) Desert ecosystem, Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)	
Unit 3	Natural Resources: Renewable and Non-Renewable Resources	8
	Land resources and land-use change; Land degradation, soil erosion and desertification. Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state). Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies.	
Unit 4	Biodiversity and Conservation	8
	Levels of biological diversity: Genetic, species and ecosystem diversity; Biogeographic zones of India;	

	<p>Biodiversity patterns and global biodiversity hot spots.</p> <p>India as a mega-biodiversity nation; Endangered and endemic species of India.</p> <p>Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions; Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.</p> <p>Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.</p>	
Unit 5	Environmental Pollution	8
	<p>Environmental pollution: types, causes, effects and controls; Air, water, soil and noise pollution,</p> <p>Nuclear hazards and human health risks</p> <p>Solid waste management, Control measures of urban and industrial waste</p> <p>Pollution case studies.</p>	
Unit 6	Environmental Policies & Practices	7
	<p>Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture.</p> <p>Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).</p> <p>Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context</p>	
Unit 7	Human Communities and the Environment	6
	<p>Human population growth: Impacts on environment, human health and welfare.</p> <p>Resettlement and rehabilitation of project affected persons; case studies.</p> <p>Disaster management: floods, earthquake, cyclones and landslides.</p> <p>Environmental movements: Chipko, Silent valley, Bishnois of Rajasthan</p> <p>Environmental ethics: Role of Indian and other religions</p>	

	and cultures in environmental conservation Environmental communication and public awareness, case studies (e.g., CNG vehicles in Delhi).	
Unit 8	Field work	5

Report on One Day Seminar
"Fundamental Of Electrochemical Sensor Using Cyclic Voltammetric Studies"
On
10th October 2019

The Department of Chemistry organized a one day seminar on "FUNDAMENTAL OF ELECTROCHEMICAL SENSOR USING CYCLIC VOLTAMETRIC STUDIES" on 10th October 2019 in HCS Hall. The seminar focused on applications of Electrochemistry in Biosensors and their Challenges. The Programme started at 10.30 am with the invocation by Shobhavathi. The dignitaries on the dias were Prof. N.Shankaresh, Principal, Dr.Ashok.N.B. Assistant Professor, Sahyadri Science College, Shivamogga, Mrs.Asha.H.D, and Mr.Shridhar.G.B, Department of Chemistry of SAFGC. Dr.N.Shankaresh, HOD of Chemistry welcomed all the delegates. Dr.Ashok.N.B, Assistant Professor, Sahyadri Science College, Shivamogg gave a special lecture on "FUNDAMENTAL OF ELECTROCHEMICAL SENSOR USING CYCLIC VOLTAMETRIC studies" in his talk Dr. Ashok N B, explained what is Voltammetry, Voltammetric Techniques, and Different types. He also detailed the basics of Cyclic Voltammetry, its important and applications. He explained about different types of electrodes and its electron transfer process. By explaining this he ended his lecture.

Dr. N Shankaresh, the Principal, made presidential remarks. The lecture programme concluded by vote of thanks by Smt. Asha H D.

Report on One Day Seminar
“Importance of Nanotechnology and Nanomaterials in the Field Basic Science
and Technology”

on
9th February 2019

The Department of Chemistry in our college has conducted a one day seminar on “**Importance of Nanotechnology and Nano-materials in the Field Basic Science and Technology**”. The seminar begins with the invocation by Shobhavathi. Dr. N. Shankarsh, HOD of Chemistry welcomed all the delegates. The opening session was addressed by Dr. Jagadhish, Assistant Professor, Department of Chemistry, Yuvaraj’s College, speaker of this event, gave a brief overview of the current knowledge on the Nanoscience and its interdisciplinary application. **Dr. Jagadhish** talked about the Nano-particle research, which is currently an area of intense scientific interest due to a wide variety of potential applications in biomedical, optical and electronic fields. He talked about the few techniques related to waste water purification developed in his laboratory. He mentioned about the portable water purifier based on Ag nanoparticles. In his speech, he emphasized the Nanomaterial’s science and technology which has created a promise to living system for the better future by its applications of nanomaterials. He presented the remained challenges of nanomaterials synthesis, and its significant role in the areas of environment and health. He also acknowledged that students effort is crucial to meet the challenges remained to address the problem of green energy.

Prof.K.Chandran, the principal, made presidential remarks. Finally, the programme was concluded by vote of thanks by Mr.G.B. Shridhar, Department of Chemistry.

Report on One Day Seminar
"NANOTECHNOLOGY FOR FUTURE GENERATION"
on
17th October 2017

A one day seminar on "Nanotechnology For Future Generation" has been conducted on 17th October 2017, at HCS hall in order to educate the students on Nanoscience and Nanotechnology. The event begins with the welcome address by Mrs. Hemalatha and followed by invocation by Shobhavathi. Dr.N.Shankaresh, HOD of chemistry welcomed all the delegates. Opening remarks and introduction of the programme was given by Dr.N.Shankaresh. He highlighted the applications of Nanoscience and Nanotechnology in Energy and Environmental concern. He mentioned that a large scale production of nanomaterials remains challenging and urge students to take up their further studies in this discipline.

Dr. Harish K N, Associate professor, Department of Chemistry, Rajiv Gandhi Institute of Technology, Vishweshwarayya University Bangalore delivered a talk on "NANOTECHNOLOGY FOR FUTURE GENERATION". He emphasized on how nanotechnology is useful for future development and its contribution to the economic growth and job creation in the coming decades. And also he explained benefits of nanotechnology in future, might help us make electrical lines, solar cells, battery storage, food packing, environmental sensors and also nanotechnology helps to detecting and improvement of treatment of cancer. By explaining this he ended his lecture on Nanotechnology for future generation.

The entire session was an interactive session and the speakers answered many queries raised by the participants. The overall programme was co-ordinate with the support of the Principal, faculty and students of the department of Chemistry. Prof. Devaraju P S. the principal, made presidential remarks. Finally, Dr. N. Shankarash, HOD of Chemistry, made Vote of thanks.
