IQAC Sponsored Guest Lecture Programme in Mathematics

On

"Recent Advancements in Pure Mathematics"

A BRIEF REPORT:

The IQAC and Department of Mathematics of our college conducted a guest lecture on "Recent Advancements in Pure Mathematics" at special lecture series programme on 14th september 2016.

With the invocation by Miss. Shruthi of final Year B.Sc. student the guest lecture programme commenced. All the delegates were addressed and welcomed by Prof.k.Chandran, HOD OF mathematics. In his welcome speech many recent advancement in Mathematics were explained and also about the models in Mathematics.

Dr. Giniswamy, HOD of Mathematics, PES College, Mandya addressed the gathering and spoke about the importance of Fixed Point Theory in pure Mathematics. In the interaction the students III B.Sc. asked many questions about the topic.

Prof. K.S Devaraju, the Principal, delivered the presidential address. In the Presedential address the Principal spoke about the personality developement of the student as well as the importance of communictaion skill and computer knowlwdge and also stressed the responsibilities of the students at the students' career.

The lecture programme was concluded with the vote of thanks by Mr. M.N.Mohan, department of Mathematics.

ENVIRONMENT DAY CELEBRATION

A BRIEF REPORT.

On 5<sup>th</sup> June 2015 we had celebrated National Environmental Day in the college campus by planting different varieties of plants in the college campus. Mr. C.N. Ashok the environmentalist was the chief guest of the programme. Prof. K.S. Devaraju presided over the programme. Prof. E. Naganna, NSS Officer of our college was also present in the programme. Many of our students were also planted the plants like Neem, Teak & Honge etc. On that day the employees and the students were cleaned the campus to make grand success of swachh Bharath Andholon.

**Respected Sir,**

**Subject: Permission to conduct one day study tour to Water packaging plant.**

As per the syllabus, we have planned to conduct one day study tour on 09/10/2017 to water packaging unit, Channarayapatna for the purpose gaining knowledge on drinking water processing steps; Storage of water, Osmosis technique, Chlorine gas process, Sand filtration, Carbon filtration, Microfiltration, Bottle filling, Packaging, Marketing and branding. The study tour is conducted for Final year B.Sc students. Hence I kindly request you to give the permission. Hemalatha K M, Shridhar G B, Dr.Rashmi.B.G are assigned to take the enrolled students to this study tour. Please do the necessary action.

Thanking you

Yours faithfully

**Water Packaging Plant Factory Industrial Visit Report**

Place of Visit : Water Packaging Plant, near Channarayapatna, Hassan Dist.

DATE : 09-10-2017

Binding with the curriculum and extension of the syllabus, we visited water packaging plant. Students came to know opportunities in eater employment opportunities in drinking water purification and packaging. aqua The brief of study trip is as follows:

On 9/10/2017, we have been to water supply area near Channarayapatna. In that plant, 5000 bottles are packed per day. It is popular water packaging plant near the rural location at Channaryapatna. It is situated outside the village. We left channarayapatna on 9/10/2017 at 10:00am by the college bus along with our HOD Dr. N. Shankaresh and other staff members. We reached the water packaging plant there at 10:40 am.

Water filters near Channarayapatna taluk produces 5000 bottles per day. In that water packaging plant, packaged drinking water uses water from any source which has to be treated and disinfected a process that could involve filtration, UV or Ozone treatment or reverse osmosis before it is fit for human consumption.

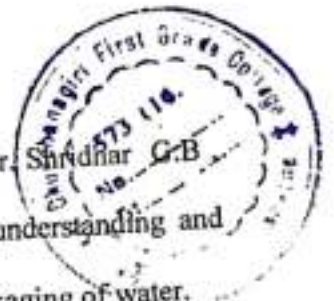

There we came to know that packaging is done by basic requirements. These are mainly 4 section in a packaged drinking water plant needs. Total space 5000sq ft built up area with 3000sq ft of covered area, 65 HP Power.

Approximately 3000 LPH of raw water of which 70% will be used and 30% will be rejected. This is however an indicative quantity as it will depend on the TDS (Total dissolved solids) of the water. In the packaging plant, we came to know that the price of mineral is Rs 10-12 while mineral water starts at Rs 20 per liter and can go up to Rs 125 per liter.

After knowing all these, we came to know the water and packaging process. We had great opportunity to visit the water packaging plant filter, we had interaction with the workers in the packaging plant to know the advantages and challenges in the water industry. Students were curious to see the packaging of water.

The whole trip was planned and organized by Mrs. Hemaltha K.M, Mr. Shridhar G.B. Dr.Rashmi B.G who guided all the way. The trip helped very much in understanding and appreciating water packaging plant which is the basic idea of knowing the packaging of water.

Report on One Day Seminar  
" NANOTECHNOLOGY FOR FUTURE GENERATION "  
on  
17<sup>th</sup> October 2017

A one day seminar on "Nanotechnology For Future Generation" has been conducted on 17<sup>th</sup> October 2017, at HCS hall in order to educate the students on Nanoscience and Nanotechnology. The event begins with the welcome address by Mrs. Hemalatha and followed by invocation by Shobhavathi. Dr.N.Shankaresh, HOD of chemistry welcomed all the delegates. Opening remarks and introduction of the programme was given by Dr.N.Shankaresh. He highlighted the applications of Nanoscience and Nanotechnology in Energy and Environmental concern. He mentioned that a large scale production of nanomaterials remains challenging and urge students to take up their further studies in this discipline.

**Dr. Harish K N**, Associate professor, Department of Chemistry, Rajiv Gandhi Institute of Technology, Vishweshwarayya University Bangalore delivered a talk on **"NANOTECHNOLOGY FOR FUTURE GENERATION"**. He emphasized on how nanotechnology is useful for future development and its contribution to the economic growth and job creation in the coming decades. And also he explained benefits of nanotechnology in future, might help us make electrical lines, solar cells, battery storage, food packing, environmental sensors and also nanotechnology helps to detecting and improvement of treatment of cancer. By explaining this he ended his lecture on Nanotechnology for future generation.

The entire session was an interactive session and the speakers answered many queries raised by the participants. The overall programme was co-ordinate with the support of the Principal, faculty and students of the department of Chemistry. Prof. Devaraju P S. the principal, made presidential remarks. Finally, Dr. N. Shankarash, HOD of Chemistry, made Vote of thanks.

**“The Sources of the Renewable Energy & its Conservation”**

On 22<sup>nd</sup> Jan. 2017 the “Planning Forum” of the Department of Economics had arranged a special guest lecture programme at HCS A/V Hall. The topic of the guest lecture was “The Sources of the Renewable Energy & its Conservation”. The speaker of the programme was Mr. K. Ravi, Senior Faculty, Mahathma Gandhi Institute of Renewable Energy and Development (MGIRED).

Mr. K. Ravi inaugurated the function and gave an elaborate lecture on the topic. He spoke about the importance of solar energy and its utilization in the daily life in place of non-renewable energy sources. After concluding his lecture he gave sufficient time for the students to interact with him.

The function was presided over by Prof K.S. Devaraju, Principal. He too spoke the importance of Solar Energy and other alternate energy. Prof. Austin J.S. Raj, Vice-Principal, Prof. S.B. Shivakumar, HOD of Sociology, Prof. K. Chandran, HOD of Mathematics & IQAC Co-ordinator were present.

Dr. H.S. Ravindra, HOD of Economics welcomed the gathering and introduced Mr. K.Ravi. Mr. K.M. Vijaykumar proposed the vote of thanks. The programme was compeered by Ms. Rakshitha J.J.

Prof. E. Naganna, the NSS Officer had arranged the saplings to be planted in the campus the make the function more relevant. All the saplings were placed in the different corners of the campus by the guest and teachers.

**Guest Lecturer Programme in Botany on ALGAE OF HASSAN DISTRICT**

**A BRIEF REPORT:**

Department of Botany organized a guest lecture on "Global Warming" on 28th August 2017. The inaugural function commenced with an invocation by Miss. Shwetha followed with the welcome speech by Prof. Kambegowda, HOD of Botany. The resource person of the guest lecture programme was Dr. Thoyajaksha, HOD of Botany, Govt. Science College, Hassan. Prof, Chandran the Principal was the President of the function. The programme was concluded vote of thanks by Mr. K.L. Ramaswamy, Department of Botany.

DEPARTMENT OF MATHEMATICS

**A BRIEF REPORT:**

The IQAC and the department of mathematics of our college conducted a guest lecture on "linear algebra" at special series lecture series programme on 20<sup>th</sup> feb 2017 with the blessings of padmabhushana Dr. Sri Sri Sri Balagangadharanath Mahaswamiji, SAC Math, Nagamangala and late Sri H.C. Srikantiah, former Revenue Minister, Government of Karnataka.

The guest lecture commenced with an invocation by Miss. Deeksha.P.

Prof. K. Chandran, HOD of mathematics, welcomed all the delegates. At the welcome address Prof. K. Chandran explained the importance of a special branch of Mathematics and its Applications.

Prof. Manjunath, Department of mathematics, PES College, Mandya addressed the gathering and spoke about the personality development of the students as well as the importance of Linear Algebra in Mathematics.

Prof. K. S. Devaraju, the principal, delivered the presidential address. The lecture programme was concluded with the vote of thanks by Mr. M. K. Mohan, Department of mathematics.

**Respected sir,**

**Sub:** Permission to conduct one day study tour to Sugar factory.

As per the syllabus we planned to organize one day study tour on 19/09/2018 to Sugar factory, Channarayapatna for the purpose of gaining knowledge in sugar factory which includes the process of harvesting, washing and Initial Preparation, Juice Extraction, Purification of Juice, Crystallization, Centrifugation, Drying and Packaging. The study tour is conducted for Final year B.Sc (PCM & CBZ) students. Hence I kindly request you to grant us the permission. Our Department faculty members Hemalatha K M, Shridhar G B and Premakumari A C. are assigned to take the responsibility of students during this visit.

Thanking you,

**Sugar Factory Industrial Visit Report**

Place of Visit : Srinivasapura, Hassan district

Date : 19-09-2018

As a part of the curriculum and in the intention to know about sugar industry, students got an opportunity to visit Srinivasapura sugar factory and their surroundings. The brief account tour as follows.

On 19-09-2018, we had been to Srinivasapura sugar factory. In that Industry 185 million tons of sugar was produced. It is one among the industries situated near to Channarayapatna town. The industry is just 15km far from Channarayapatna. We travelled by campus bus along with our HOD and other staff members. we straight away reached Srinivasapura at 9.20 am. It was sunny when we reached commercial department.

Chamundeshwari Sugar factory at Srinivasapura near to Channarayapatna taluk grows sugar cane. The factory had produced sugar from sugarcane which had been purchased from growers at Rs 2100 per ton during 2014-15. Also State government had fixed a price of Rs 2500

per ton. As in the case of any other factories across the state, Chamundeshwari factory too had objected to the government price and agreed to pay the price on par with other factories.

In the industry students came to know that sugar is produced in two principal ways from beet or cane. In beet production sugar is extracted or leached from sliced sugar beets, after which juice is purified through a series of milk of lime and  $\text{CO}_2$  process steps. The filtered juice evaporated (thickened) and sugar is crystallized from it.

Apart from these, afternoon we had lunch and then return back to the factory to know the manufacturing process of sugar.

Then they explained to the students about the raw juice extraction process and other process such as thermal treatment and chemical conditions (under pH 7.1). and then defecated juice is heated under  $103^{\circ}\text{C}$ .

We had an interaction with many people and workers in the factory. curious to ask question and got satisfied with answer.

This trip helped students very much in understanding and appreciating the knowledge about industries which is the basic idea of knowing the facts of sugar industries commercially.

Report on One Day Seminar

**“Importance of Nanotechnology and Nanomaterials in the Field Basic Science and Technology”**

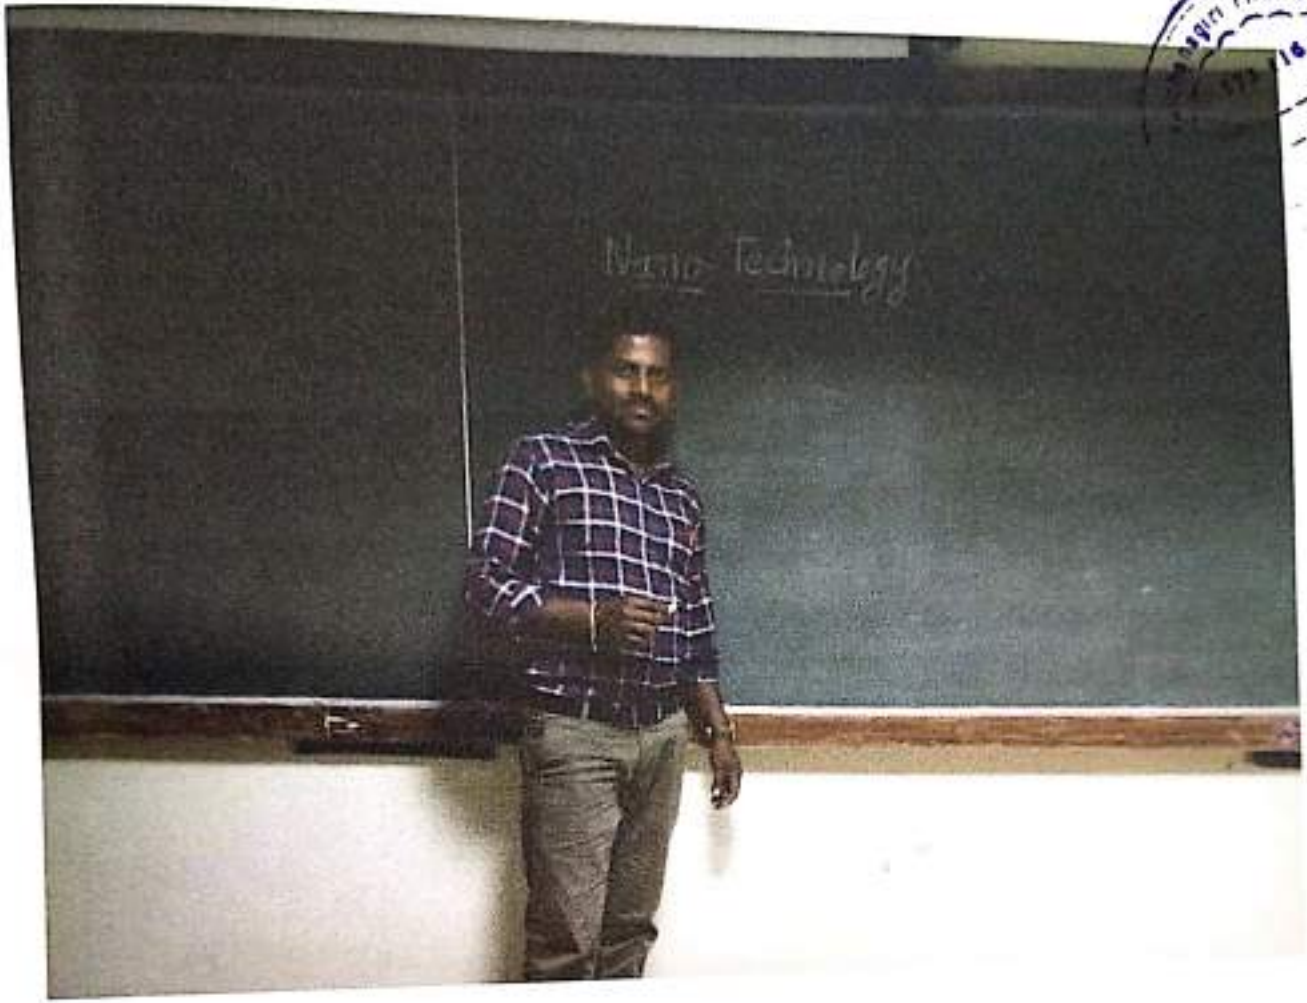

on  
9<sup>th</sup> February 2019

The Department of Chemistry in our college has conducted a one day seminar on **“Importance of Nanotechnology and Nano-materials in the Field Basic Science and Technology”**. The seminar begins with the invocation by Shobhavathi. Dr. N. Shankarash, HOD of Chemistry welcomed all the delegates. The opening session was addressed by Dr. Jagadhish, Assistant Professor, Department of Chemistry, Yuvaraj’s College, speaker of this event, gave a brief overview of the current knowledge on the Nanoscience and its interdisciplinary application. **Dr. Jagadhish** talked about the Nano-particle research, which is currently an area of intense scientific interest due to a wide variety of potential applications in biomedical, optical and electronic fields. He talked about the few techniques related to waste water purification developed in his laboratory. He mentioned about the portable water purifier based on Ag nanoparticles. In his speech, he emphasized the Nanomaterial’s science and technology which has created a promise to living system for the better future by its applications of nanomaterials. He presented the remained challenges of nanomaterials synthesis, and its significant role in the areas of environment and health. He also acknowledged that students effort is crucial to meet the challenges remained to address the problem of green energy.

Prof.K.Chandran, the principal, made presidential remarks. Finally, the programme was concluded by vote of thanks by Mr.G.B. Shridhar, Department of Chemistry.

### **Nandini Milk Production Plant Factory Industrial Visit Report**

Place of Visit : Nandini Milk Production Plant (KMF) Factory, Shettihalli, Channarayapatna

Date : 07-10-2019

#### **Aim of Industrial Visit:**

Industrial visit is considered as one of the tactical methods of teaching. We can know the things practically through interaction, working methods. It gives exposure from academic point of view industrial visit provide us information about practical working environment.

#### **NAME OF THE INDUSTRY**

Nandini Milk Production Plant (KMF) Factory ,Shettihalli, Channarayapatna

**About KMF (Karnataka Milk Federation):** It was started in the year 1975 as per the act of KDDC (Karnataka Dairy Development Corporation). In 1983, it was renamed as KMF (Karnataka Milk Federation)

As part of the curriculum, our college has organized an industrial visit to students. Our college has arranged campus bus to reach the destination around 10 am. Everyone were

fascinated after looking at the infrastructure, garden maintenance and hygienic conditions of the factory. Before getting into the premises, all students wore head cap, face mask and hand gloves, which made the students to know about the maintenance of hygienic in food industries. First we had been to the main plant, Milk processing plant.

We also took students to the milk transportation center, where they distribute the end product to the every corner of the state. All students know the other processing steps which involved in dairy industries such as separation, preservation and package. The idea of unpasteurized milk separation is explored to the students, which inculcate students to think innovative practices remained in the food industries.

The next unit is cream pasteurization unit. The raw unpasteurized cream was stored in the tanks and next there are so many tubes through this the separated milk enters to the pastarisation unit.

After students visiting to ghee plant, they come across the knowledge of extraction of butter and ghee. In the beginning, the milk was separated from cream nothing but butter is sent to ghee plant then butter was transferred to ghee cattle to get pure butter (removing water content from it) then it was transferred to ghee settling tank there it removes all the sediments then it transferred to final tank there they had flavor odor etc. Then it goes for granulation part after it is sent to laboratory test followed by package to the customer. Students also got a chance to visit an ice cream plant. Here the fatty butter is the main raw material for ice cream production. The starting point to ending process, the entire process was done by machine. All students enjoyed the fresh ice creams in the production. Here we ate so many sweets they are freshly prepared and too tasty.

Totally, faculties and students enjoyed the science behind industry from this entire trip. We came to conclude that the works which were done by humans in earlier days was shifted to machine, so we think the industrial revolution created so many jobs.

After the discussion with HOD and other staffs, we left the factory at 2.30pm by college bus and finally we reached our college at 2:45pm.

At last but not the least, we all are thankful to our college Principal and HOD of chemistry department and other staff members who are all supported us for the industrial visit.

Report on One Day Seminar  
"Fundamental Of Electrochemical Sensor Using Cyclic Voltammetric Studies"  
On  
10<sup>th</sup> October 2019

The Department of Chemistry organized a one day seminar on "FUNDAMENTAL OF ELECTROCHEMICAL SENSOR USING CYCLIC VOLTAMETRIC STUDIES" on 10<sup>th</sup> October 2019 in HCS Hall. The seminar focused on applications of Electrochemistry in Biosensors and their Challenges. The Programme started at 10.30 am with the invocation by Shobhavathi. The dignitaries on the dias were Prof. N.Shankaresh, Principal, Dr.Ashok.N.B. Assistant Professor, Sahyadri Science College, Shivamogga, Mrs.Asha.H.D, and Mr.Shridhar.G.B, Department of Chemistry of SAFGC. Dr.N.Shankaresh, HOD of Chemistry welcomed all the delegates. Dr.Ashok.N.B, Assistant Professor, Sahyadri Science College, Shivamogg gave a special lecture on "FUNDAMENTAL OF ELECTROCHEMICAL SENSOR USING CYCLIC VOLTAMETRIC studies" in his talk Dr. Ashok N B, explained what is Voltammetry, Voltammetric Techniques, and Different types. He also detailed the basics of Cyclic Voltammetry, its important and applications. He explained about different types of electrodes and its electron transfer process. By explaining this he ended his lecture.

Dr. N Shankaresh, the Principal, made presidential remarks. The lecture programme concluded by vote of thanks by Smt. Asha H D.

DEPARTMENT OF MATHEMATICS

## A BRIEF REPORT

The department of mathematics of our college conducted a special guest lecture on "Complex Analysis" at special lecture series programme on 16<sup>th</sup> sep 2019. The guest lecture commenced with an invocation by Miss. Kavya Prof..K.Chandran, HOD of mathematics, welcomed all the delegates. At the welcome address Prof.K.Chandran explained the importance of complex Analysis.

Dr.Guruprasad, HOD of Mathematics, Govt ,Science College, Channarayapatna addressed the gathering and spoke about the various new research in Complex Analysis.

Dr.N Shankarsh , Principal of the S A F G college ,delivered the presidential address, in his address he talked about the contributions of Ramanujan Srinivasan to Mathematics.The lecture programme was concluded with the vote of thanks by Mr.M.N.Mohan, Department of Mathematics.

Report on One Day Seminar

**“Importance of Nanotechnology and Nanomaterials in the Field Basic Science and Technology”**

on

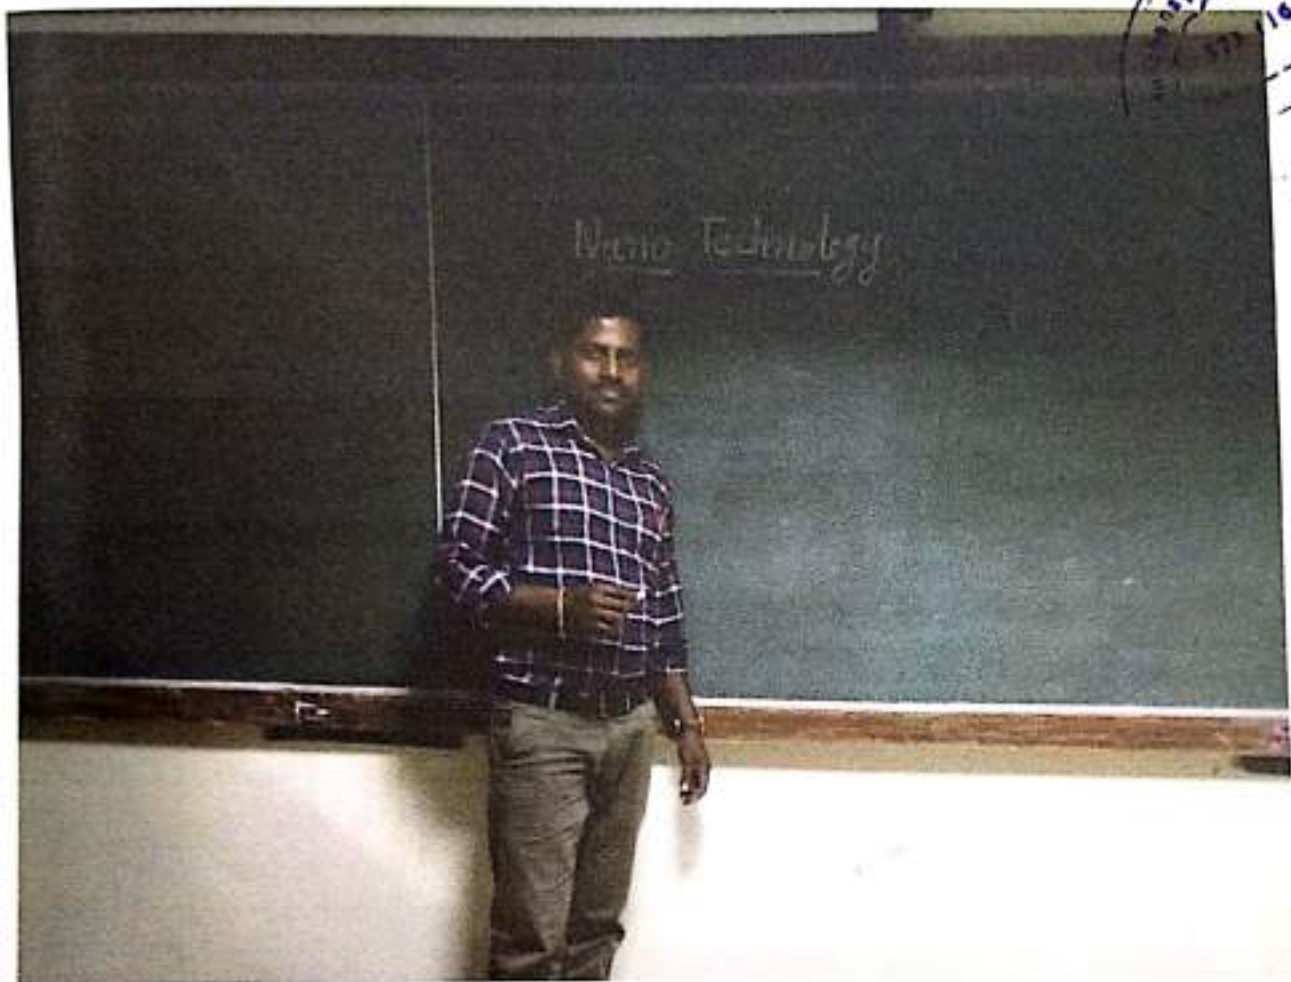

9<sup>th</sup> February 2019

The Department of Chemistry in our college has conducted a one day seminar on **“Importance of Nanotechnology and Nano-materials in the Field Basic Science and Technology”**. The seminar begins with the invocation by Shobhavathi. Dr. N. Shankaresh, HOD of Chemistry welcomed all the delegates. The opening session was addressed by Dr. Jagadhish, Assistant Professor, Department of Chemistry, Yuvaraj’s College, speaker of this event, gave a brief overview of the current knowledge on the Nanoscience and its interdisciplinary application. **Dr. Jagadhish** talked about the Nano-particle research, which is currently an area of intense scientific interest due to a wide variety of potential applications in biomedical, optical and electronic fields. He talked about the few techniques related to waste water purification developed in his laboratory. He mentioned about the portable water purifier based on Ag nanoparticles. In his speech, he emphasized the Nanomaterial’s science and technology which has created a promise to living system for the better future by its applications of nanomaterials. He presented the remained challenges of nanomaterials synthesis, and its significant role in the areas of environment and health. He also acknowledged that students effort is crucial to meet the challenges remained to address the problem of green energy.

Prof.K.Chandran, the principal, made presidential remarks. Finally, the programme was concluded by vote of thanks by Mr.G.B. Shridhar, Department of Chemistry.

Respected Sir,

**Sub:** Permission to conduct one day study tour to NANDINI MILK PLANT.

As per the syllabus, we have planned to conduct one day study tour on 07/10/2019 to NANDINI MILK PLANT, Channarayapatna for the purpose understanding the manufacturing process of milk products. The study tour is exclusively conducted for final year B.Sc (PCM & CBZ) students. Hence I kindly request you to grant the permission. The faculty members are assigned to take the students to the field visit are Hemalatha K M, Meghana R C, Asha H.D.

Thanking you

**Nandini Milk Production Plant Factory Industrial Visit Report**

Place of Visit : Nandini Milk Production Plant (KMF) Factory, Shettihalli, Channarayapatna

Date : 07-10-2019

**Aim of Industrial Visit:**

Industrial visit is considered as one of the tactical methods of teaching. We can know the things practically through interaction, working methods. It gives exposure from academic point of view industrial visit provide us information about practical working environment.

**NAME OF THE INDUSTRY**

Nandini Milk Production Plant (KMF) Factory ,Shettihalli, Channarayapatna

**About KMF (Karnataka Milk Federation):** It was started in the year 1975 as per the act of KDDC (Karnataka Dairy Development Corporation). In 1983, it was renamed as KMF (Karnataka Milk Federation)

As part of the curriculum, our college has organized an industrial visit to students. Our college has arranged campus bus to reach the destination around 10 am. Everyone were

fascinated after looking at the infrastructure, garden maintenance and hygienic conditions of the factory. Before getting into the premises, all students wore head cap, face mask and hand gloves, which made the students to know about the maintenance of hygienic in food industries. First we had been to the main plant, Milk processing plant.

We also took students to the milk transportation center, where they distribute the end product to the every corner of the state. All students know the other processing steps which involved in dairy industries such as separation, preservation and package. The idea of unpasteurized milk separation is explored to the students, which inculcate students to think innovative practices remained in the food industries.

The next unit is cream pasteurization unit. The raw unpasteurized cream was stored in the tanks and next there are so many tubes through this the separated milk enters to the pastarisation unit.

After students visiting to ghee plant, they come across the knowledge of extraction of butter and ghee. In the beginning, the milk was separated from cream nothing but butter is sent to ghee plant then butter was transferred to ghee cattle to get pure butter (removing water content from it) then it was transferred to ghee settling tank there it removes all the sediments then it transferred to final tank there they had flavor odor etc. Then it goes for granulation part after it is sent to laboratory test followed by package to the customer. Students also got a chance to visit an ice cream plant. Here the fatty butter is the main raw material for ice cream production. The starting point to ending process, the entire process was done by machine. All students enjoyed the fresh ice creams in the production. Here we ate so many sweets they are freshly prepared and too tasty.

Totally, faculties and students enjoyed the science behind industry from this entire trip. We came to conclude that the works which were done by humans in earlier days was shifted to machine, so we think the industrial revolution created so many jobs.

After the discussion with HOD and other staffs, we left the factory at 2.30pm by college bus and finally we reached our college at 2:45pm.

At last but not the least, we all are thankful to our college Principal and HOD of chemistry department and other staff members who are all supported us for the industrial visit.

## Industrial Visit

SAFG College CR Patna had organized an industrial visit on 22-01-2020 Wednesday to Chamundeswari sugar factory Srinivaspura, Channarayapatna Taluk Hassan District, registered under the Co-operative societies Act, Chamundeswari Sugars Limited (SCSL), incorporated in December 1970, is promoted by Dr.N.Mahalingam of the 'Sakthi Group' Coimbatore, Tamil Nadu.

In this visit B.Com Students actively participated and learnt the process of converting sugar cane into Sugar and the cost incurred for the process.

The students were also given information on the cost for growing sugar cane and the incentives given by the sugar factory for growing sugar cane, like providing subsidies to the farmers, Fertilizer etc...

### Summary:

The visit was aimed to enhance the knowledge of the students, to understand the operations that are used in sugar factory and to understand different process implemented to prepare sugar from sugar cane. At industry students were able to see and understand different mechanical operations carried out in industry eg. Cutting, shredding, screening etc. Students have experienced the actual operations which are been thought in the classroom regarding the process conversion of raw materials in to various stages for finished products. The aim of visit was full filled at the end of sugar factory visit.

**OLD AGE HOME VISIT REPORT ON 13-03-2020**

Students of Sri Adichunchanagiri First Grade, From the Department of Sociology were visited to Matrubhumi free old age Home ON 13-03-2020

Dr.Praveen kumar.s, Head of the Department of sociology, Arun Kumar, Lecturer, K.B Parvathamma Assistant Professor, Department of Geography, Dr Sanjay K, Assistant Professor, Department of History were also presented.

The Programme was started by watering the plant, Dr Sanjay Assistant Professor, Department of History welcomed Naganna and his wife, who is the In charge of the old age home.

Naganna spoke to the Students that the children should respect the elder people and they should inculcate good mannerism in their life. He also guided the students to take care of their elder people when they are alive, he also emphasizes that environmental protection is the main responsibility for all of us.

Even Dr Praveen kumar.s, Head of the Department of sociology, spoke to the students and said that the students should imbibe good human qualities and ask the students to transform their lives healthily. He also suggests to take care of their parents and not to send them to the old age home when they become old.

Students sang devotional songs and a final year BA student Nayana shared her opinions about the programme and they spent about three hours in the old age home.

The students who were present in the programme spend some time with the elderly people and interact with them and listen to their problem. At the end of the programme, fruits were distributed to all and had lunch in the old age home.

Naganna, who is the care taker and the In charge of the old age home, gave a felicitous greeting for all.
